

CONDENSED CURRICULUM

Certificate in Proficiency of Ayurveda

SANATHANA AYURVEDA SKILLS DEVELOPMENT INSTITUTE

1. Basic Lessons.

1.1. Medical documents

- Medical bill
- Medical letter
- Medical certificate
- Death confirmation & clinical assessment
- Document maintaining

1.2. Doctor-patient relationship

- How to make the best relationship with patients and all practical points

1.3. How to start and provide best healthcare service through Ayurveda private practice.

- How to choose an area
- Building
- Drugs
- Materials
- Medical equipment's
- Registration in SLAMC
- Tax
- Medical Payments

SASDI

2. Ayurveda Fundamentals

2.1. *Panchamaha bũtha* and *Pancha-panchaka* concept with practical aspect

2.2. *Tridosha - Tridathu* theory

2.3. *Sapthadathu*

2.4. *Srothas & Srotho Dushti*

2.5. *Agni kosta* and *Àma*

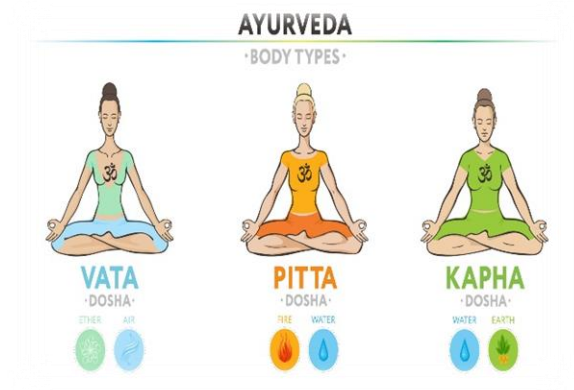

2.6. *Saptha padàrtha*

- *Bàwa - Abawa padàrtha*
- *Rasa panchakaya*
- *Dravya guna Mùladarma*
- How drugs act on the body
- How to create therapeutic regimens
- Routings & *Dravya guna*

2.7. *Trimala*

2.8. *Ojas*

- Immunity
- Auto- immune diseases

SASDI

3. Therapeutic fundamentals

3.1. *Nidàna mùladarma roga - rògi parikshà*

3.2. *Astavida parīksha*

- *Nàdi*
- *Sparsha*
- *Muthrà*
- *Druk*
- *Mala*
- *Àkruthi*
- *Jiwhà*
- *Sabdha*

3.3. *Pancha nidàna*

3.4. *Shad kriyàkàla*

3.5. *Chikithsà bēda*

3.6. *Dashavida parikshà*

3.7. *Pramàna*

- *Prathyaksha*
- *Anumàna*
- *Apthopadēsha*
- *Yukthi*
- *Prathyaksha badhà*

3.8. Medical terminology

3.9. Basic Pathology

3.10. Case discussions

SASDI

4. *Nidàna Chikithsà*

**All the clinical methods, patho-physiologies, investigations and treatment regimens with Ayurveda concept will be discussed under all clinical lessons.

4.1. *Vàtha Ròga*

Introduction of all *patthu* varieties, oils, their practical usage and *sweda widi* with logical Ayurvedic concept.

- *Sandigatha vātha*
- Osteoarthritis
- Tendonitis and all related diseases
- *Kati shùla - greewa shùla*
- All etiologies of

Cervical & lumbar spondylosis

Lumbar and cervical radiculopathies with clinical Assessment.

- Tennis-Golf elbow
- CTS
- *Wishwàchi*
- *Ansha shòsha*
- Trigger finger
- Scoliosis – kyphosis
- Winging scapula
- Foot drop
- Wrist drop
- Ankle Spur
- *Shiro-Marma Abigàtha*
- Introduction to nervous system and all clinical assessments
- Cerebrovascular Accident and its subtypes
- Convulsions
- Parkinson's disease
- Multiple Sclerosis

ALS.

- PBP
- Facial Palsy
- MND
- CSVD
- PMA

4.2. *Snèha karma*

4.3. *Swèdha karma*

4.4. *wasthi Karma*

4.5. *Keraliya Panchakarma*

- *Shiro dhàra*
- *Shiro wasthi*
- *Nawarakishi*
- *Pizichil*
- *Sashtika shali pinda sweda*
- *Pathra pinda sweda*

4.6. *Àma vàtha*

- Rheumatic fever
- Rheumatoid arthritis and related clinical assessments.

4.7. Skin diseases

- *Kusta*

Kshudra and *maha kusta* types

Identification

Primary and secondary skin lesions

Inflammatory skin lesions

Infectious skin lesions

All types of eczema

Vàtha raktha

Types

Utthàna and *gambira*

Modern comparison

- *Swithra*/ Leucoderma
Special treatment protocol
- Burning ulcers

4.8. NCD

- Obesity (*Athisthula*)
Introduction
Types
Modern analysis
Treatment
- Hypercholesterolemia (*Medowruddhi*)
Introduction
Types
Modern analysis
Treatment
- Hypertension & cardiovascular diseases.
Ischemic Heart diseases
Acute Coronary Syndrome
Unstable and stable angina
Congenital Heart diseases
Heart block
How to Create and identify ayurvedic pathophysiology
Ayurvedic treatment protocol

SASDI

Diabetes (*Prameha*)

Introduction

Types

Diabetics mellitus pathophysiology

Types

Clinical presentation

Complications

Ayurvedic analysis

MODY

Treatment analysis

4.9. GIT pathologies

- Gastritis and all Sub types.

Amla pittha

Annadrava shula

Parinama shula

Peptic ulcer disease

- Liver disease

NAFLD

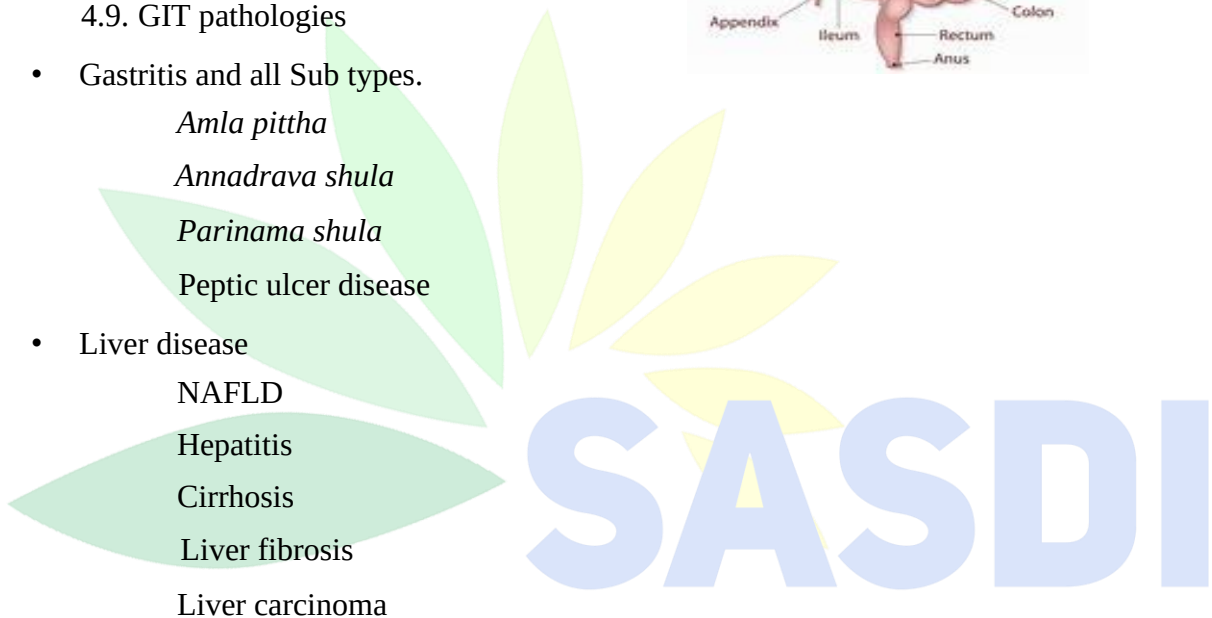

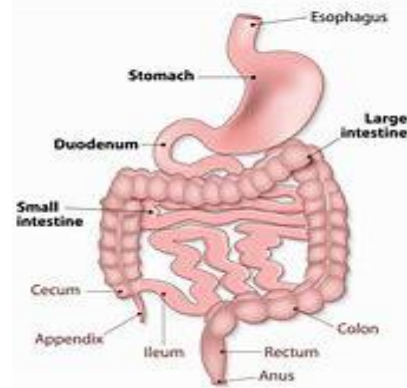

Hepatitis

Cirrhosis

Liver fibrosis

Liver carcinoma

HUMAN GASTROINTESTINAL TRACT

And clinical signs

Cyanosis

Jaundice

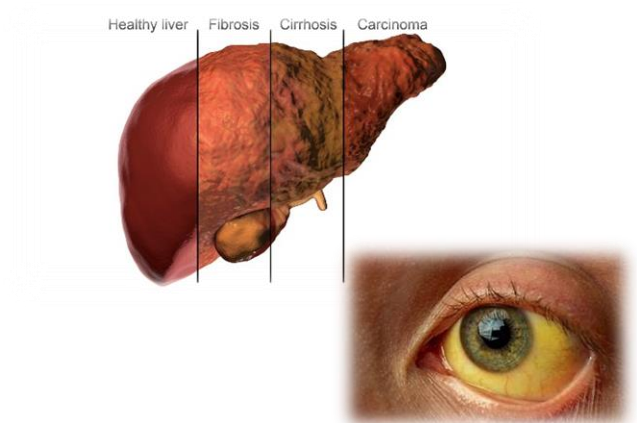

Clubbing

Ascites

Caput medusa

Spider neave

Palmar erythema

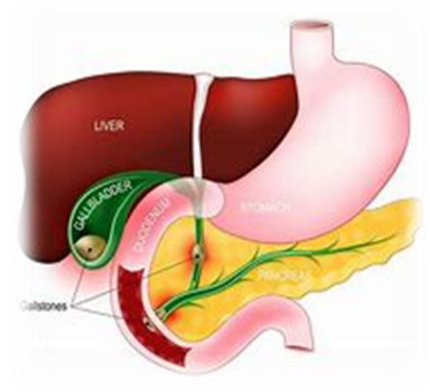

GB pathologies

Cholecystitis

Cholelithiasis

Gilbert syndrome

- Crohn's disease
- Ulcerative colitis
- IBS
- Diarrhea

4.10. *Wamana karma*

4.11. *Wirechana karma*

5. Orthopedics

** All the clinical methods, patho-physiologies, investigations and treatment regimens with Ayurveda concept will be discussed under all clinical lessons.

5.1. Practical rules

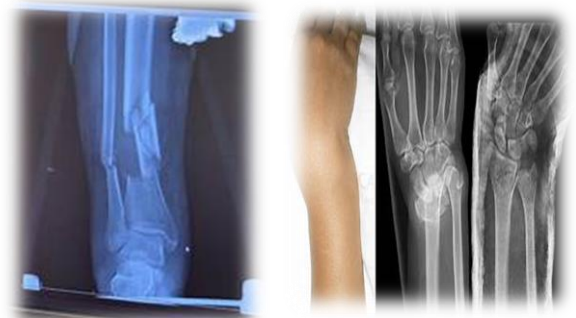

5.2. Soft tissue injury

- Introduction
- ITBS
- Rotator cuff injury
- Hamstring injury
- ACL tear
- MCL tear
- Muscle strain
- Contusion
- Hematoma

5.3. Fractures and dislocations

- Clavicle fracture
- Shoulder dislocation
- Humerus fracture
- Elbow dislocation and fracture
- Radius -ulna fracture
- Wrist subluxation
- Wrist fracture
- Finger fracture
- Ribs' fracture
- Vertebral fracture
- Wedge and compression fractures
- Pelvic fracture
- Hip fracture
- Tibia fibula fracture

- Patellar fracture
- Knee dislocation
- Femur fracture
- Ankle dislocation
- Foot fracture

All methods of

- Olition
- Suedation

All technical aspects of

- Manipulations
- Pastes
- Bandages

6. X Ray

- What is Radiology
- X-ray production
- Medical uses of X-ray
- X-ray Equipment's
- Modern x-ray Equipment's
- Principles of CT and MRI
- X-ray image production process
- How to request X-ray
- Chest and abdomen
- Upper limb
- Lower limb
- Skull
- Vertebral column
- X-ray image interpretation
- Skull
- C- spine
- Chest X-ray
- Vertebral column
- Pelvis
- Shoulder joint
- Elbow joint
- Wrist joint
- Hand
- Knee joint
- Ankle joint
- Foot
- Image evaluation related to all body parts
- Basic knowledge of coronary angiogram and image evaluation

SASDI

7. Surgery

** All the clinical methods, patho-physiologies, investigations and treatment regimens with Ayurveda concept will be discussed under all clinical lessons.

7.1. Introduction.

7.2. Surgical instruments

- *Yantra- upayantra*
- *Sasthra- anusasthra*
- Modern equipments

7.3. *Yanthra - sasthra karung asta vidha sasthra Karma*

Modern method - ano rectal disease

- Anatomy and physiology
- Hemorrhoid / *arshas*
- fistula in ano / *Bagandara*
- Pilonidal sinus
- Anal fissure
- Solitary ulcer syndrome
- Proctalgia fugax anorectal abscess
- Rectal prolapse
- All clinical methods and treatments
- Urinary diseases
- Urinary retention/*mutra gàtha*
- *Mutrà kuccha*
- *Mutrashmari*/ urinary calculi
- BPH
- Prostate carcinoma
- CKD
- UTI

SASDI

7.4. Vascular diseases

- Lower limb venous drainage
- VCV
- Clinical methods and treatments
- Scrotal swelling and hernia
- Anatomy and pathology - clinical methods and treatments

7.5. *Agni karma*/ medical cauterization

7.6. Ulcers /*wrana* types clinical methods and treatments.

7.7. Abscess, lymphadenopathy, cyst

7.8. *Rakhtha mòkshana*

8. ECG

8.1. Anatomy of the heart

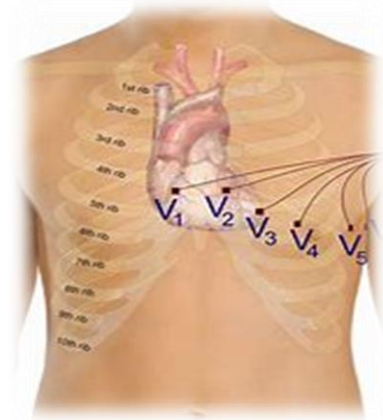

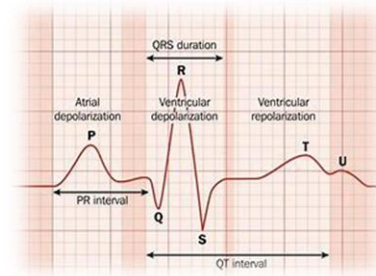

8.2. Histology of cardiac muscle

8.3. Basic physiology of the heart

- Electrical potential of the normal cell
- Electrical potential of the cardiac muscle
- Electrical potential of the SA node
- Conducting system of the heart

8.4. Introduction of ECG

- ECG machine
- Normal ECG patterns
- Abnormal ECG patterns
 - i. Tachyarrhythmia
 - ii. Bradyarrhythmia
- Acute coronary syndrome and ischemic ECG patterns other abnormal ECG patterns and rare ECG changes

9. ENT and ophthalmology

** All the clinical methods, patho-physiologies, investigations and treatment regimens with Ayurveda concept will be discussed under all clinical lessons.

- 9.1. Anatomy of ear nose throat
- 9.2. Physiology of ear nose throat
- 9.3. Clinical methods
- 9.4. Allergic and Infective rhinitis - nasal polyps
- 9.5. Sinusitis
- 9.6. Cough
- 9.7. Bronchial Asthma, COPD
- 9.8. Headache types and pathology-cephalgia

Sinusitis
Migraine
Tension Headache
Cluster Headache
SOL

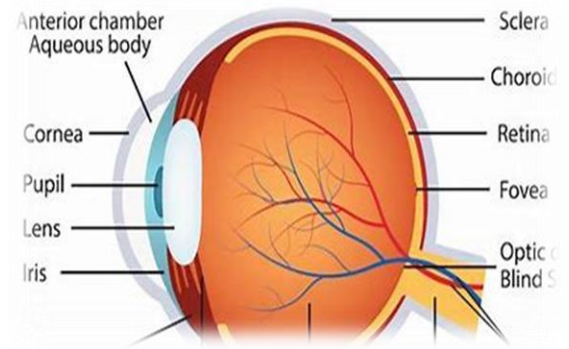

9.9. Ear diseases

- Types
- Clinical methods
- Investigations

9.10. Ophthalmology

- Anatomy
- Physiology
- Clinical assessment of the eye
- *Kàcha* / cataract
- *Thimira*
- *Linganàsha*
- Complete blindness
- Pterygium
- *Nagana-Lagana*
- Glaucoma
- Diabetic retinal disease
- Conjunctivitis
- Subconjunctival hemorrhage
- *Akshi tharpana*

9.11. *Nasya Karma*

9.12. Goiter and thyroid impairment

Hypothyroidism

Hyperthyroidism

Thyroglossal cyst

Types of goiter

Thyroid CA

SASDI

10. Male subfertility

** All the clinical methods, patho-physiologies, investigations and treatment regimens with Ayurveda concept will be discussed under all clinical lessons.

10.1. Introduction

10.2. Anatomy and physiology of male genitalia

10.3. Ayurveda view

10.4. Etiology

10.5. Seminal fluid (*Shukra*)

10.6. Treatment

11. Gynecology

** All the clinical methods, Patho-physiologies, investigations and treatment regimens with Ayurveda concept will be discussed under all clinical lessons.

11.1. Ayurveda and modern anatomy and physiology

11.2. *Arthawava*-Ayurveda view

- Menarche
- Menopause
- Menstrual cycle

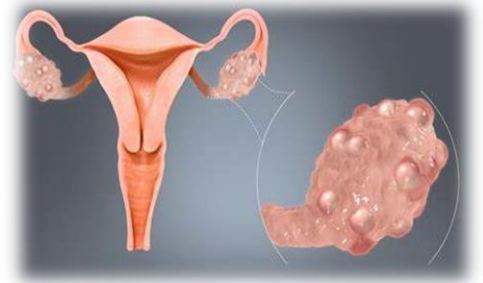

11.3. *Yoni vyapath.*

11.4. *Astavidha Arthava dusti.*

11.5. Terminology.

11.6. *Arthawa kshya.*

- PCOD
- Clinical presentation
- Pathology
- Investigation and treatment

11.7. *Raktha Pradara*/ Uterine bleeding

11.8. Uterine fibroid.

11.9.

11.10. Chocolate cyst

11.11. Ovarian cyst

11.12. PID

11.13. Leucorrhea

11.14. Female subfertility

12. Acupuncture

12.1. History

12.2. Advantages of learning acupuncture

12.3. Types of Oriental medicines

12.4. Fundamentals of acupuncture

- Yin & Yang theory
- Sa-Sang, Medicine
- Five elements theory
- Theory of visceral phenomena

12.5. Causes of disharmony

12.6. Diagnostic measures in OM

12.7. Acupuncture & meridian

12.8. Physiological concepts and relationship among the Zang-zy organs.

12.9. Acupuncture types

- Moxibustion
- Cupping therapy
- Auricular acupuncture
- Electric acupuncture
- Special points in acupuncture

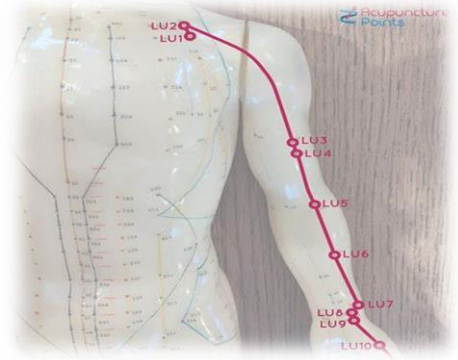

12.10. Practical acupuncture points

08 Meridians

- (1) Lung
- (2) Heart
- (3) Pericardium
- (4) Spleen
- (5) Liver
- (6) Kidney
- (7) Large intestine
- (8) Small intestine

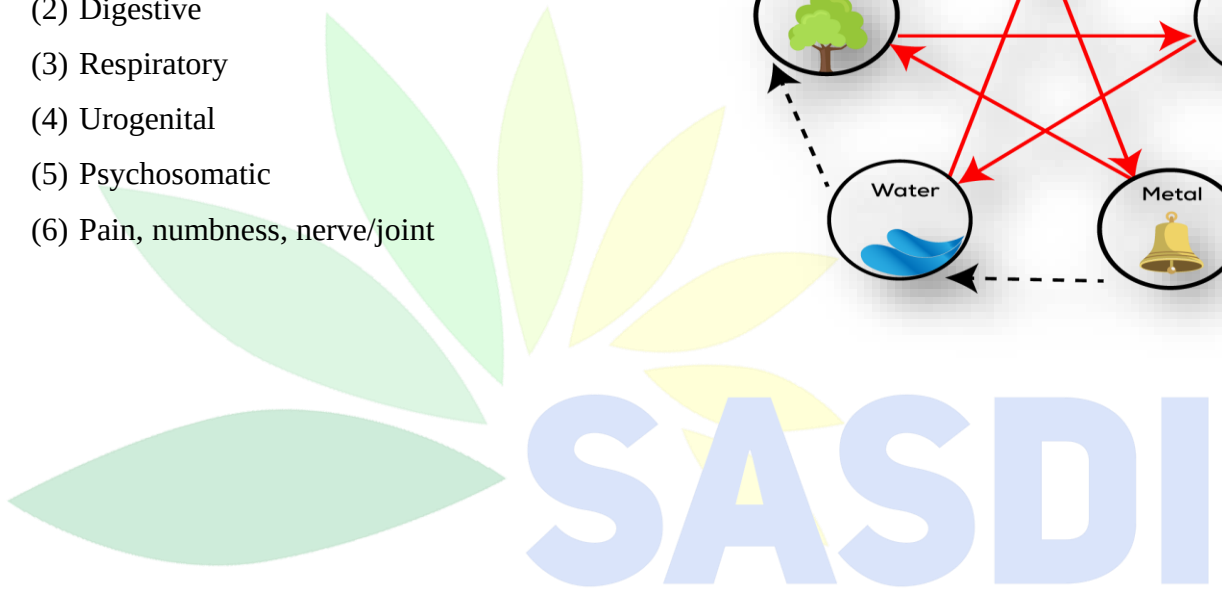

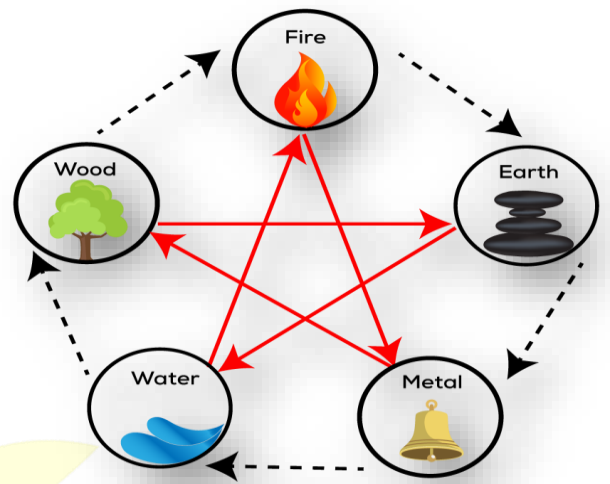

- (9) Triple energizer
- (10) Gall bladder
- (11) Urinary bladder
- (12) Conceptional vessel
- (13) Governor vessel

12.11. Acupuncture in Systems

- (1) Brain, cardiovascular
- (2) Digestive
- (3) Respiratory
- (4) Urogenital
- (5) Psychosomatic
- (6) Pain, numbness, nerve/joint

13. *Àwarana*

Discuss all practical approaches of *Àwarana Vâtha*.

14. *Kshudra Roga*

**** All the clinical methods, patho-physiologies, investigations and treatment regimens with Ayurveda concept will be discussed under all clinical lessons.**

14.1.Introduction

14.2.

- Hair loss
- Premature grey hair
- *Indraluptha*
- *Arunshika*
- *Kunakaya*
- *Chippa*
- *Kadara*

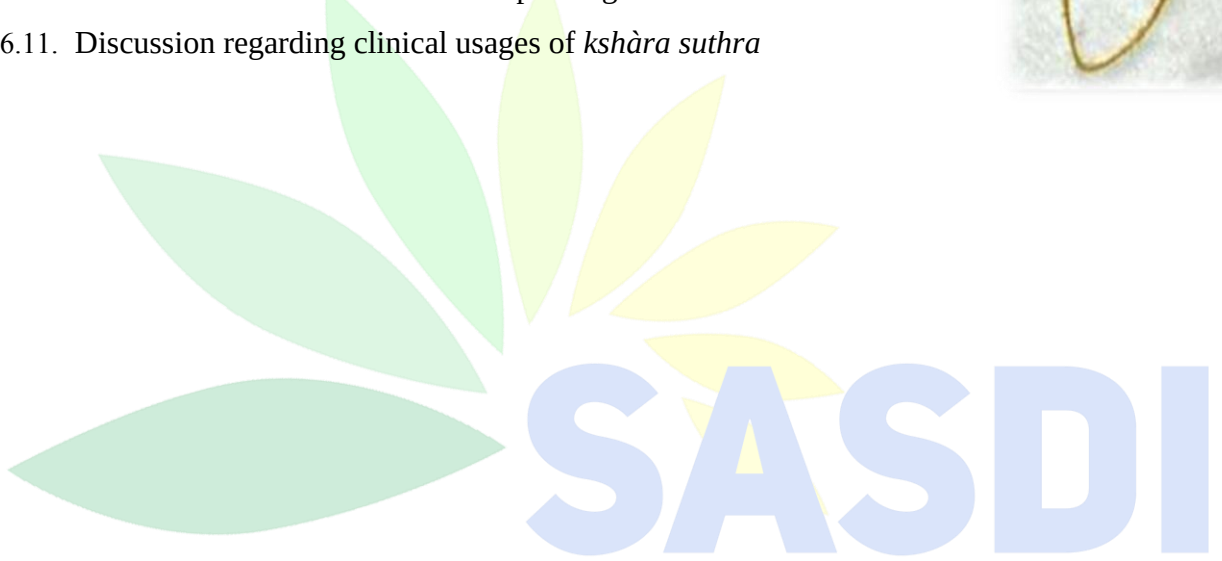

15. Drug manufacturing

- 15.1. *Panchavida kashaya kalana*
- 15.2. How to grow and collect proper medicinal plants and parts
- 15.3. Maintain the quality of raw materials
- 15.4. Addition and special maturing procedures of *kashàya chùrna guli kalka*
- 15.5. Preparation of balm, gritha, thaila and shampoo
- 15.6. Common discussion regarding *dravya guna* and drug preparation
- 15.7. Practical visits for 2 days

16. Manufacturing of *Kshàra*

- 16.1. Introduction
- 16.2. *Kshàra* classification
- 16.3. Manufacturing process of *prathisharaniya* and all *kshàra*
- 16.4. clinical assessment of *kshara* before using
- 16.5. Usage of *kshàra*
- 16.6. Qualities of *kshàra*
- 16.7. Introduction of *kshàra suthra*
- 16.8. Manufacturing process of *kshàra suthra*
- 16.9. Types of *kshàra suthra*
- 16.10. Preservation of *kshàra suthra* and packing
- 16.11. Discussion regarding clinical usages of *kshàra suthra*

17. Yoga

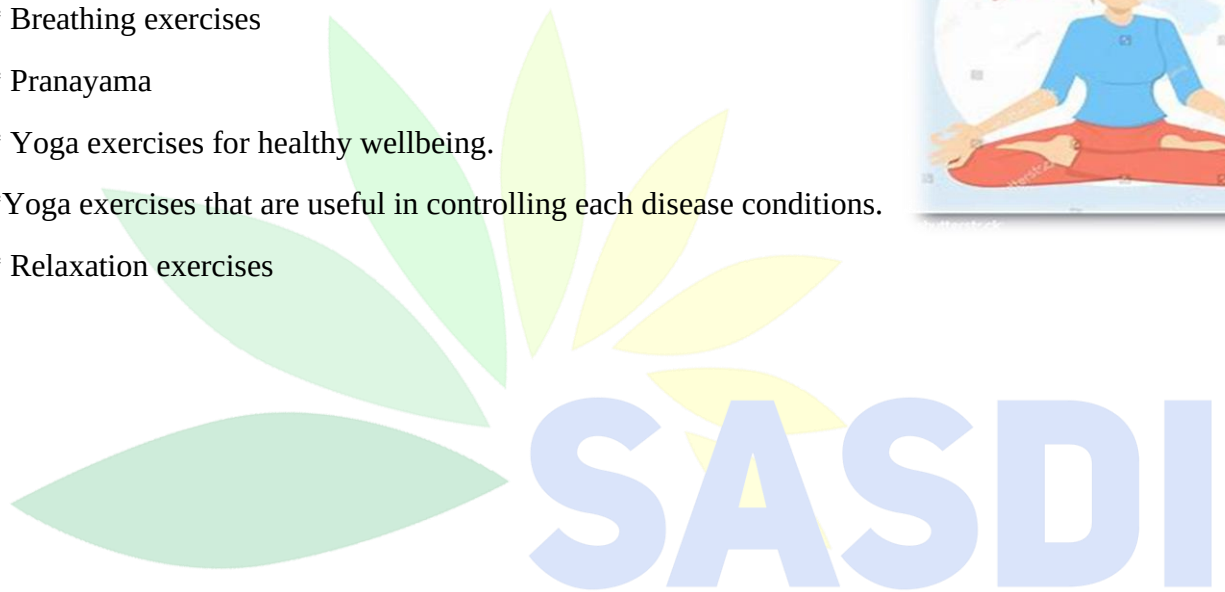

A basic introduction to the yoga philosophy.

- * Common practical concepts relevant to the present.
- * Importance of yoga philosophy to Ayurvedic doctors
- * Deficits of Ayurveda therapy which can be done by the yoga exercises.
- * Yoga concepts that can be used in the psychological disease conditions.
 - * Yoga asanas and pranayama that can be applied separately to each of the commonly found diseases.

Practical session

- * Breathing exercises
- * Pranayama
- * Yoga exercises for healthy wellbeing.
- * Yoga exercises that are useful in controlling each disease conditions.
- * Relaxation exercises

18. Basic Life Support

18.1. NG tube insertion.

- Introduction and preparations for NG tube insertion
- Anatomy of the oral cavity, pharyngeal area, esophagus and stomach
- Indications and contraindications

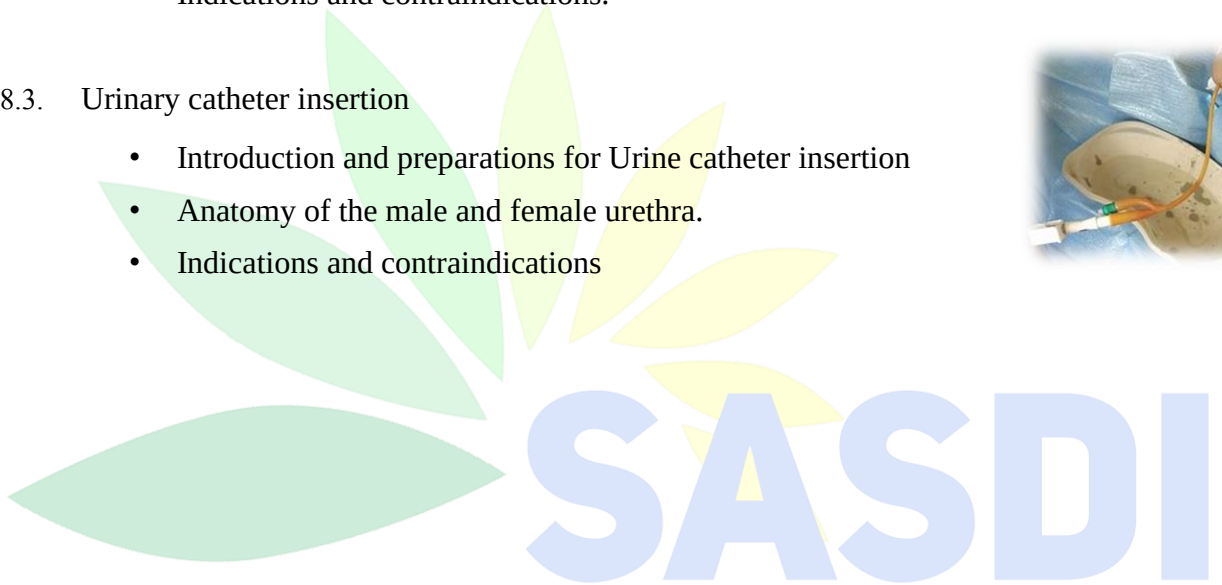

18.2. Cannulation

- Introduction and preparations for IV cannula insertion
- Anatomy of the venous system
- Indications and contraindications.

18.3. Urinary catheter insertion

- Introduction and preparations for Urine catheter insertion
- Anatomy of the male and female urethra.
- Indications and contraindications

19. Food and Ayurveda

- 19.1. Food and diseases
- 19.2. Food and nutrition
- 19.3. Food instructions
- 19.4. Nutrition
- 19.5. *Vàjīkarana yoga*
- 19.6. Antenatal food regimes
- 19.7. Foods according to *thridàthu*

SASDI

20. Psychology

20.1. Introduction

20.2. *Manas* concept

- *Mano guna*
- *Pancha-panchakaya*

20.3.

- *Unmada*
- *Smruthi bhramsha*
- *Mano vikara*

20.4.

- Bipolar disease
- Anxiety
- OCD
- Personality disorders
- Schizophrenia
- Feeding and eating disorders
- Trauma & stress
- Depression
- Disruptive impulse control disorders
- Substance addiction
- Neuro-cognitive disorders
- Dissociative disorders
- Somatic symptom disorder

20.5. Treatment protocol

SASDI
